SMALL BODY TIGHTLY CLOSED 小小身躯 亲密无间

三合一连接件的优点如下:

- 预埋螺母:加固专用;连接杆:连接专用;偏心头:解决了板材之间锁紧问题。通过、涨栓,螺栓,偏心件组合的三合一连接,牢固。
- 三合一连接可以多次拆装。这也是板式家具的优点之一。
- 隐蔽,从外表面看不到三合一连接件。
- 三合一连接,减少了黏合剂的使用,更加环保。

The advantages of the three-in-one connector are as follows:
• Embedded nut: special for reinforcement; connecting rod: special for connection; eccentric head: solves the problem of locking between plates. The three-in-one connection of pass, expansion bolt, bolt and eccentric combination is firm.
• The three-in-one connection can be disassembled multiple times. This is also one of the advantages of panel furniture.
• Concealed. The three-in-one connector cannot be seen from the outer surface.
• Three-in-one connection reduces the use of adhesives. More environmentally

HISTORY OF CONNECTORS

连接件的历史

在家具生产过程中,板与板之间起到紧固和连接作用的部件,就是家具连接件,家具连接件中使用最多的是偏心连接件,因此现代家具行业中家具连接件一般就是指偏心连接件。

中国传统家具原本不需要家具五金配件,所有功能的实现都是以木质结构为基础,金属在古代只作为一种装饰应用在家具中,直至清明时期,金属才在家具实现了简单的功能。板材家具和目前国外采用的“偏心连接件”的名称自80年代传入中国,家具五金配件才开始在家具中大量使用。经过近30年的发展,家具五金配件在家具中的作用也越来越重要,人们对家具的品质关注也开始从板材、环保慢慢转向了五金配件。随着近年来家具现代化个性化的发展步伐,人们家具的需求也已经从最原始的收纳功能慢慢转向对精致生活的体验需求,而这些这种体验就直接感受自家具五金配件,因此,在未来一段时间内,家具五金配件将成为家具整体品质的最关键因素。

人们就以配件的数量取名:三合一连接件,还有二合一、四合及其他的连接件,因为三合一这种类型用的最为普遍,所以在国内三合一连接件就成了偏心连接件的代称。三合一连接件主要用于板式家具的连接件,三合一由三部分组成:三合一相当于传统木工里的钉子和槽榫结构。分别是偏心头(又名偏心螺母、偏心轮、偏心件等等)、连接杆(螺栓)、预埋螺母(涨栓、塑料的俗称塑胶粒)三部分。

明希一直致力于用心筑就美好的家居生活,让五金连接件如何与家具的设计、生产、安装等环节实现无缝嵌接,规范家具五金连接件的应用,蕴含着深邃的产业文化,努力填补家具连接件技术领域的空白。

In the furniture production process, the parts that play the role of fastening and connecting between the board and the board are the furniture connectors. The most commonly used furniture connectors are the eccentric connectors. Therefore, the furniture connectors in the modern furniture industry generally refer to Eccentric connector. Traditional Chinese furniture originally did not require furniture hardware accessories. All functions are realized based on wooden structures. Metal was only used as a decoration in furniture in ancient times. It was not until the Qingming period that metal realized simple functions in furniture. Panel furniture and the name "eccentric connector" currently used abroad have been introduced to China since the 1980s, and furniture hardware accessories have only begun to be widely used in furniture. After nearly 30 years of development, the role of furniture hardware accessories in furniture has become more and more important, and people's attention to the quality of furniture has gradually shifted from sheet metal and environmental protection to hardware accessories. With the development of modernization and personalization of furniture in recent years, people's needs for furniture have gradually shifted from the most primitive storage function to the demand for exquisite life experience, and these experiences are directly felt from furniture hardware accessories. Therefore, in the future, furniture hardware accessories will become the most critical factor in the overall quality of furniture.

People named it after the number of accessories: three-in-one connectors, as well as two-in-one, four-in-one and other connectors. Because the three-in-one type is the most common type, it is a three-in-one connector in China. It became a synonym for eccentric connector. The three-in-one connector is mainly used for the connector of panel furniture. The three-in-one is composed of three parts: the three-in-one is equivalent to the nail and groove structure in traditional woodworking. There are three parts: eccentric head (also known as eccentric nut, eccentric wheel, eccentric piece, etc.), connecting rod (bolt), and embedded nut (expanding bolt, commonly known as plastic pellets).

Meiki has always been committed to building a beautiful home life with heart, so that how hardware connectors can be seamlessly integrated with furniture design, production, installation and other links, and standardizing the application of furniture hardware connectors, contains profound industrial culture, and strives to fill the gap in the field of furniture connector technology.

MK-KR-A008 带缓冲阻尼胶头支撑 MK-KR-A008 Soft close damping gas support

订货号 Item number	MK-KR-A008
产品材质 Material	塑料 Plastic、铁 Iron、铜 copper、钢 steel
管表面处理 Finish	镀铬 Chrome plating、喷漆 Spray paint
中心距 Central distance	245mm
行程 Stroke	90mm
举力规格 Lift specification	20-350N
产品用途 Product use	液压下翻支撑 Hydraulic upturn to support
用途说明 Description	可使合适重量的上翻木门 / 铝框门慢慢向上翻起，并在60°—90°的开启角度之间产生缓冲作用。 It can make the proper weight of the upturned wooden door/aluminium frame door slowly turn up, and can produce a buffer effect between the opening angle of 60°-90°.

MK-KR-A004 盖仔头胶芯上翻支撑 MK-KR-A004 Lift up gas support with two plastic fixators

订货号 Item number	MK-KR-A004
产品材质 Material	塑料 Plastic、铁 Iron、铜 copper、钢 steel
管表面处理 Finish	镀铬 Chrome plating
中心距 Central distance	245mm
行程 Stroke	90mm
举力规格 Lift specification	20-350N
产品用途 Product use	气动上翻支撑 Pneumatic upturn support、液压下翻支撑 Hydraulic upturn to support
用途说明 Description	可使合适重量的上翻木门 / 铝框门稳定速度慢慢向上翻起。可使下翻木门 / 铝框门稳定速度缓慢向下翻。 Description: can be used to double the weight of wood door/aluminium-frame door to stabilize slowly upward or downward.
